A. Full and residual norms
Fit: p = 1.999899
Scaled transverse norm
Time $t$
$h^4\|W_4\|_N$
After trial-space projection
$t^2$ guide
B. Snapshot spectra
Fraction of squared norm per mode
Wavenumber $|k|$
t = 152.1
t = 304.15
t = 456.2
t = 608.3
$k_{\mathrm{Nyq}} = 16$
C. Four normalized aligned snapshots
Squared singular-value fraction
POD mode
27.62%
25.54%
25.18%
21.66%
